FEATURED PROJECTS

(More details at: gbilea.github.io)

Investigate a Relational Database

- Utilized SQL to analyze the Sakila DVD Rental database, crafting SQL queries to uncover insights and address pertinent questions within the dataset.
- Executed SQL queries and presented the results using data visualizations with Excel.

Tools and technologies: PostgreSQL, Excel

Explore US Bikeshare Data

- Utilized Python to analyze data from bike share systems in three prominent cities of the United States.
- Developed code to import and manipulate the data, allowing for the calculation of descriptive statistics to uncover insights.
- Created a script that provides an interactive terminal experience, allowing users to input raw data and receive real-time statistics, enhancing the accessibility and usability of the analysis.

Tools and technologies: Python, NumPy, Pandas, Jupyter Notebook, GitHub

LICENCES AND CERTIFICATION

- Programming for Data Science with Python (Udacity Nanodegree Program, *November 2023*)
- NYSC Certificate of National Service (National Youth Service Corps, *November 2022*)
- Diploma in Leadership Development (African Leadership Development Centre, *Oct 2021*)
